

Using nFORM 2.0 Tools to Monitor HMRF Performance Measures

Grant recipients can use a range of data tools in nFORM 2.0 to monitor their program operations and services provided, as well as the characteristics and outcomes of their clients. To help grant recipients dig deeper into their performance, this tip sheet maps each type of HMRF performance data in the Performance Progress Report (PPR) and narrative sections to relevant nFORM 2.0 data tools. This tip sheet is organized to follow the structure of PPR Section C—Quantitative (Numeric) Performance Measures. The appendix of this tip sheet includes more information on each of these data tools and when to use them. The [HMRF Grant Resource site](#) includes a range of additional resources to help grant recipients use nFORM 2.0 data tools for program monitoring, including the [nFORM 2.0 User Manual \(Module VIII\)](#) and the [data dictionary](#) of fields included in the data export.

Contact the nFORM 2.0 help desk with any questions about using nFORM 2.0 data tools, or anything else related to nFORM 2.0, by either submitting a ticket through the [help tab](#) of nFORM or emailing us at nform2helpdesk@mathematica-mpr.com. We are happy to help!

^a Note that the PPR/QPR sections in the table reflect the section number in the PPR. The same quantitative information is found in QPR Section B (except for substantive service contacts, which are not reported in the QPR). READY4Life grant recipients serving youth in school settings can also generate the School Year Performance Report to monitor performance measures reported in the PPR using the academic calendar as the reporting period (July 1 – June 30) rather than the grant year (September 30 – September 29).
